ACT or SAT prep. Strategies and fundamentals.

Study Skills

The difference between good students and great students is just the way they learn.

Course Previews

Get ahead by learning the subject matter during the summer.

Rigorous learning without a rigid schedule. The perfect way to keep your child engaged without ruining summer their summer fun and your summer vacation plans.

Summer Workshops

More Classes Available - Please Ask Your Center Director

You want your child to stay engaged and learn as much as possible in a short time, but you don't know how to make that happen during summer.

Our **Summer Flex Camps** can help your child catch up or get ahead this summer and be prepared next year for school.

Engenius tutors understand what your child needs to maximize their learning. Our students often make greater gains over the summer with us than they do over the entire year at school.

Course Previews 6th Grade to 12th Grade

Course previews are our most popular summer class. These previews give students a *head start* in any subject area they need. Our math previews are very popular and can reduce anxiety and fear. We preview **Pre-Algebra** up through **AP Calculus A/B & B/C, including AP Stats**.

Besides math, course previews are very helpful in **Bio, Chemistry, and Physics**. We can also help in **Spanish and French!**

If you don't see a subject you need, please ask us!

SUMMER READING @ ΣNGENIUS LEARNING CENTER

If you don't have a summer reading plan set up for your child yet, ask us for help in setting one up. We will help you come up with short-term and long-term reading plans that include good literature. We then will help you choose books at the right reading level to challenge your child. Your child's summer reading plan should be asking insightful questions that require deeper thought than just searching for details. As school curriculum has changed, so have the demands of reading comprehension. Make certain you ask your child what-if questions, alter a character's behavior or change the setting to see if that would have an impact on the outcome. Call us today to find out how to set up a summer reading program for your child.

We teach great minds to think a lot!

Σmerging Readers: Focus on Phonics Kindergarten to 2nd Grade

With young readers, it is crucial they have a solid foundation in phonics. Our Σmerging Reader program is the perfect program for new readers. We blend phonics with vocabulary and comprehension development at the Goldilocks level (not too easy, not too hard, but just right).

Reading Σnrichment 3rd Grade to 12th Grade

Common Core Standards have shown that many students struggle because they lack the key fundamental skills required for success. Our curriculum teaches students engagement and all of the required skills to *level up*.

Math Fundamentals 1st Grade to 8th Grade

Do you have a student who struggles with Common Core Math? A great deal of frustration with the Common Core has come from math. The Σngenius way is to take a step back and realize that CC Math demands a solid foundation in basic math skills. Our Math Fundamentals program will help your child *level up* to be better prepared for next year.

Summer School Homework Support All Grades

Every child can use a little help now and again, particularly when it comes to Summer School. We offer subject tutoring in most subjects to make certain the time spent this summer is not wasted. Contact us for subjects taught.

Math Problem Solving 2nd Grade to 8th Grade

Looking for more than just the fundamentals?

Our Problem Solving workshop is just the solution. Since Common Core Math has shifted the focus away from just the basics, this course focuses on problem-solving at all of the major skill areas (fundamentals, fractions & decimals, geometry, pre-algebra and algebra skills).

Σssential Study Skills 6th Grade to 12th Grade

Frustrated that assignments are done at the last minute and not up to standards? If so, you are not alone. In a recent survey of colleges, the main concerns were that incoming students were underprepared and overstimulated. For students with these particular struggles, our Σssential Study Skills course is the answer. Our curriculum is customizable to focus on what your child needs. Some of the critical elements we will cover are: setting priorities, managing time and projects, note-taking and test prep.

ACT & SAT Prep: Strategies & Fundamentals 9th Grade to 12th Grade

Not a one-size fits all approach, our test preparation courses focus on the areas your child needs most. We tailor curriculum and instruction to fit the unique needs of each student. We offer extra practice that can be done at the center or at home, as well as practice tests to make certain what we are doing is working for your child.
